

# Data privacy workshop

Guarding your digital presence

## About the workshop

Data has emerged as one of the most valuable assets in today's interconnected digital landscape, driving innovation, commerce, and communication. However, the growing reliance on data has raised significant concerns, particularly regarding the escalating cyber threats and privacy issues.

On August 11 2023, the Honourable President granted approval for the Digital Personal Data Protection Act (DPDPA), 2023, commonly referred to as the 'Privacy Law' or 'Data Protection Law.' This historic legislation promotes accountability in the management of digital personal data, emphasising the importance of explicit and transparent consent for data collection, processing, and storage.

Grant Thornton Bharat is delighted to announce an online workshop on the **Digital Personal Data Protection Act** to equip participants with the intricacies of data privacy and data protection. Our masterclass equips you with the knowledge and skills necessary to excel in the complex realm of data privacy, empowering you to safeguard your information effectively.

### Learning outcomes

Upon completion of the masterclass, participants will have the ability to:

Develop data privacy policies and mechanisms to safeguard their organisations

Enhance business operations and instill stakeholder confidence in their organisations

Implement automated tools for compliance

Create training and communication strategies to raise awareness effectively

## Key topics for the session

Domain	Sub-Domain
Act overview and journey	Journey of the Act
	Applicability
	Data principal rights
	Key penalties
	Consent
	Obligations of data fiduciaries, processors & principals
	Key stakeholders involved
	Privacy principles
Essential Act definitions	Data transfer
	Digital personal data
	Data fiduciary
	Significant data fiduciary
