

Certificate in Data Visualisation using Microsoft Power BI

Online live training

#GTBharat
SHAPING VIBRANT INDIA

Dynamic data storytelling with Power BI visuals

About the programme

In today's data-rich landscape, we often find ourselves swamped with complex information. Raw data, being multidimensional, can be challenging to interpret, hindering effective communication and decision-making. Nevertheless, through data visualisation, raw data can be transformed into visuals that reveal patterns and trends, facilitating clear communication and informed decision-making. LearninGT is excited to introduce its certification programme, 'Data visualisation using Microsoft Power BI'. This course is designed to provide participants with a comprehensive grasp of Power BI's data visualisation capabilities, enabling them to proficiently analyse and present data in a professional and impactful manner.

Learning outcomes

After completing the course, participants will be able to:

- Craft compelling visual presentations by effectively importing data from Excel and other sources
- Extract valuable insights from data, constructing charts, tables, maps, and more
- Develop interactive and aesthetically engaging dashboards and reports using Power BI tools
- Utilise Power BI's features to delve into data, discern patterns, and derive insights from extensive datasets
- Implement best practices for creating impactful data visualisations from extensive data sources

Who should attend?

MIS professionals
Business intelligence professionals
Data scientists
Students
Business analyst
Project managers
Entrepreneurs

Programme coverage

Data visualisation

- Determination of the most effective visualisation for each data set
- Significance of data visualisation and various data types suitable for visual representation
- Identifying the optimal visualisation approach for each specific dataset

Power BI

- Introduction to Power BI and its installation

Power Pivot

- Introduction to Power Pivot and its analysis capabilities in the environment
- Exploring the Power Pivot environment and its benefits
- Advantages of Power Pivot

Power query and Power view

- Concept of Power Query and Power View
- Data cleaning in Power BI using Power Query

Data Connections in Power BI from various sources: Excel, CSV, live data sources like SQL, webpages, and more

Index and conditional columns

Writing functions and error-handling

DAX expression

Measures, calculated members, row, filter and evaluation context, context interactions, context over relations and schema relations

Power BI Visuals

- Building basic charts
- Chart formatting
- Annotation
- Summary tables

Filters in Power BI

- Page level & visual level filters
- Report level filters in Power BI slicers

Connecting Python to Power BI and running Python scripts

Dashboard creation

Programme details:

**Duration**

20 hours of live online training through Cisco Webex

**Schedule**

13, 14, 20, 21 December 2025

**Fees**

INR 18,000 plus taxes

Programme deliverables

- Extensive course material
- Quizzes and assessments
- Access to Grant Thornton Bharat LMS for one year
- Post-training support
- Certificate of completion post final assessment

LearninGT

LearninGT is an upskilling service offering of Grant Thornton Bharat. We aim to empower individuals with the most sought-after skills for thriving in today's evolving professional landscape. By leveraging the expertise of industry-leading professionals and innovative teaching methodologies, we help participants acquire the right knowledge and skills to drive success.
